

OUR ENVIRONMENTAL POLICY

“BURSA GELATİN GIDA SAN. AND TRADE A.Ş” has an environmental management system that includes all units. In this system, environmental officers assigned to each unit work together with experts from environmental consultancy companies licensed by the Ministry of Environment and Urbanization. Internal audit reports and monthly activity reports, which are stipulated by the legislation to be done once a year, are prepared every month. Prepared internal audit reports and monthly activity reports are evaluated month by month in environmental coordination meetings held at the head office, and the renewal of the system or the elimination of deficiencies is provided immediately. In these meetings, possible changes in the legislation are identified and necessary steps are taken before they come into force.

“BURSA GELATİN GIDA SAN. AND TRADE A.Ş”, the wastes generated at each step are classified and recycled/recovered or disposed of in accordance with the legislation. As a result of the training given to employees in each of our units, waste management is carried out with zero errors. In this process, the economics of waste management have been learned very well. A significant amount of knowledge has been achieved on waste logistics.

“BURSA JELATİN GIDA SAN. AND TRADE A.Ş. suppliers also comply with the legislation in accordance with our environmental management system. All companies we work with in the field of waste management can work with us after obtaining the permits required by the legislation.

Hazardous waste generated by our facility and specified within this scope is accumulated in our hazardous waste storage area in accordance with the regulations and is disposed of in a timely manner and brought into the recycling system.

GENERAL MANAGER
